# How does GitProtect
## compare with similar products?

## What is GitProtect and what it offers regarding the git backup?

GitProtect is a professional, manageable repository and metadata backup that brings you peace of mind and protects your source code, Intellectual Property, hours of work (and money) against any event of failure.

Are your organization looking for an automatic new repository backup or backup on demand? GitProtect covers these features. Agile retention setting, secure encryption - the same.

Understand how GitProtect compares with other solutions, so you can find if it is the best fit for you organization. We also encourage you to start the free trial. By using **this link** you can test the solution for up to 30 days - no credit card required!
